New seating products for healthcare facilities

Healthcare seating plays an essential role in both patient comfort and overall care experiences. With advancements in design, today's seating options for healthcare facilities offer solutions that prioritize relaxation, reduce stress, and maximize space efficiency.

Additionally, flexible and sustainable seating alternatives are gaining traction, enabling healthcare designers to meet the evolving needs of patients and staff while focusing on comfort and sustainability.

Healthcare Design presents a roundup of the latest seating products designed to enhance healthcare environments. Visit *Healthcare Design's* [Products](#) page for more healthcare-specific products.

Muriel Reclining Sound Chair, Samuelson Furniture

Muriel Reclining Sound Chair by [Samuelson Furniture](#) incorporates Sound by Samuelson, a patented Bluetooth speaker system that creates an immersive experience. The seating is designed to recline with minimal effort and includes ergonomic seat and arm heights. The wing back tilts for lumbar and headrest support and the footrest extends for elevation.
