FURNITURE

Accessible, Counter-Height Chair Ideal for Waiting Spaces, Dining Environments

The latest introduction from Samuelson Furniture's Living by Samu-

elson collection is the Lou Lou Chair.

The accessible, counter-height chair proves to be a stylish and practical ad-

dition to common spaces such as dining areas, lobbies

and waiting rooms within healthcare environments.

The Lou Lou Chair is easy to pull up to any counter or table with a hip-length height that facilitates ease of entry and exit for users. The open hand-hold notch at the top rail allows users to easily grasp the chair to maneuver it around any space. Durable construction is enhanced with a tight upholstered seat and back, supporting stretched, tapered legs. **ID#105**
