## DOORS & HARDWARE

### AD Systems Addresses Acute Care Setting Needs with DualSwing

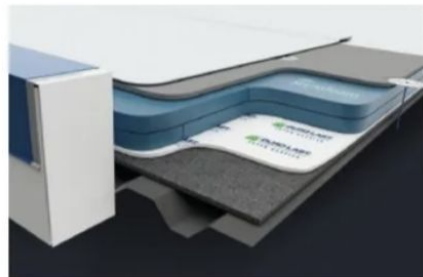

AD Systems has launched the DualSwing door system. Designed for use in acute care settings, the smoke-rated door system features a large primary door and a smaller auxiliary leaf that can open to accommodate patient beds, CT scanners, MRI suites, cath labs and other large equipment.

DualSwing's wrapped aluminum perimeter stile and rail swinging doors are available in a range of configurations to provide optimum opening clearance within a modern and durable assembly. The door assembly's aluminum frame and large glazing options can match neighboring sliding door systems for a cohesive design aesthetic that marries form and function. It is also available with various glazing options and integral blinds to suit the privacy and daylighting needs of each specific application. **ID#109**

### Push Plate Door Control Series Available with Customized Options

DeltrexUSA has introduced the T108 series push plate door control. The series features two push plates mounted on a two-gang backplate with smooth beveled edges for safety and appearance.

Internal stainless screws, marine type ¼ inch aluminum and single pole, double throw momentary switches are standard. Tested to 1 million cycles, the T108 series is available with a full list of customized options, including engraving, wording, colors and finish. **ID#110**

## ROOFING

### Duro-Last, DuPont Launch Sustainable Roofing Solution

Duro-Last, Inc. has unveiled a 50-year commercial, low-slope roofing system that significantly lowers replacement costs and reduces building materials entering the waste stream. Duro-Life 600 Roofing System is the result of a collaboration between Duro-Last and DuPont. It is ideal for hospitals and other commercial buildings that demand energy efficiency for decades. Duro-Life 600 only requires the replacement of the existing roof membrane, which can be recycled into other building products, leaving the rest of the assembly in place. In addition, the roofing system features DuPont Styrofoam Brand Insulation, which provides unparalleled performance. **ID#113**

## FURNITURE

### Allseating Collection Allows Multiple Configurations

The new Ruhe furniture collection by Allseating offers soft cleanouts between seats, and backs are featured

on all models to provide ease of cleaning. The double and triple guest configurations can be specified with intervening legs, intervening arms, or no intervening arms, allowing for efficient floor cleaning between units. Ease while cleaning is necessary for a wide range of public settings, including hospital waiting areas. **ID#111**

### Easily Cleaned Furniture Ensures Longevity

Tilt by Samuelson is a discreet, thoughtfully designed furniture system that allows the seats of many Living by Samuelson collection chairs to tilt forward. The system exposes a drop-through frame that allows the chair to be easily cleaned and maintained, ensuring optimal longevity of the product. Ease of cleaning and sanitation prolongs the lifespan of each product, ensuring both maximum quality for users and minimum waste for the environment. **ID#112**

## DECORATIVE PANELS

### EcoSupply Debuts Durable, Sustainable 3D Panels

EcoSupply has added Tekstur panels to its product portfolio. Antimicrobial and unsusceptible to staining, the easy-to-clean panels are an excellent choice for healthcare spaces, including lobbies, waiting areas and patient rooms. The panels can be cut-to-spec and delivered ready to install. They can be applied to a wide range of surfaces including walls,

furniture, millwork, or even as a solid or screen partition to create division within a space. Available in a plethora of colorways, designers can choose from a variety of geometric and eye-catching patterns that are generated and engraved into the panels. **ID#114**
