## Chairback Hardware Option

📅 January 18, 2023   👤 HCO News Staff

The patented hardware, CATCH by Samuelson, suspends a folded walker, or any personal item, on the back of the chair. The clever system completely transforms chair functionality, providing an accessible and practical solution that proactively addresses clutter and inaccessibility in public spaces--giving users peace of mind about their belongings in dining or waiting rooms. The chair promotes independent mobility and accessibility in communal spaces, providing some assistance and relief to staff.

## About Us

---

HC&O News provides valuable business news to the health care facility market. Our monthly e-mail newsletter readers include architects, engineers, and contractors as well facility and operational managers. Specific to health care is the increased attention to maintenance, operations and safety and security. HC&O News was the original news publication devoted to this growth market.
