

# METROPOLIS

## These Three Products Target Health and Wellness in the Workplace

From bleach-cleanable storage to a lounge chair with built-in speakers, these offerings from Allsteel, Carnegie Fabrics, and Samuelson Furniture are clearly post-pandemic solutions.

### Deep Listening

What appears to be a comfy lounge seat is actually a speaker you sit in. [Samuelson Furniture](#) developed the Serenity chair and its patent-pending technology Sound by Samuelson, to enable users to envelop themselves in soothing audio. To achieve a fully immersive experience, the design has no directional speakers, and therefore no wires or visible cutouts. The entire chair is the speaker.
