innovation. The annual recognition sets companies apart as top employers committed to creating supportive and people-first environments.

Achieving this certification again underscores MillerKnoll's commitment to fostering a culture of highly engaged associates. A globally recognized accreditation, Great Place to Work certification is received by companies that demonstrate they've built a high-trust and positive workplace.

The certification reflects validated feedback provided to the Great Place to Work Institute by a randomly selected population of cross-functional U.S.-based associates.

The survey evaluates five essential dimensions of employee experience: Credibility, Respect, Fairness, Pride and Camaraderie. **BoF**

Samuelson Furniture Launches a New Era of Recliners with the Muriel Sound Chair

A sleek, immersive recliner that redefines luxury and comfort for senior living.

➡ Samuelson Furniture has unveiled the Muriel Reclining Sound Chair. Designed with elevated style and engineered ergonomics, Muriel offers all the comfort and support one would expect from a quality recliner with the refined aesthetic of modern luxury.

Muriel merges exceptional craftsmanship with thoughtful innovation. The standout feature of Muriel is the integration of Sound by

Samuelson—a patented audio innovation that turns the chair itself into a Bluetooth-enabled speaker. This technology transforms the entire chair into a sound source. Designed to envelop the user in comfort, Muriel creates a cocoon-like immersive auditory experience.

“Muriel challenges the stereotype of what a recliner can be,” said Michael Chalfin, Executive Vice President of Samuelson Furniture. “We’ve crafted a chair that not only supports well-being, but also elevates the experience through beautiful design and immersive technology.”

Engineered for the needs of senior living communities, Muriel supports healthy posture with precise attention to lumbar support, seat pitch, and arm height. The firm yet plush cushions and tight, channeled back ensure deep comfort without compromising stability. A defining element, the entire upper wing section wraps dramatically around the base in cozy elegance, resulting in a design defined by the clean lines and contours synonymous with luxury environments.

“Innovation is at the heart of everything we do at Samuelson Furniture,” said Lawrence Chalfin, President of Samuelson Furniture. “Muriel is more than a recliner. It’s a multisensory experience that seamlessly blends wellness, technology, and modern design.”

From its subtly sweeping wood base to the dramatic wing-back design, Muriel brings a sculptural presence to any senior living space. The ergonomically designed seat and arm height promote ease of movement, enabling users to sit, stand, and recline with minimal effort. The chair’s backrest smoothly tilts for optimal lumbar and head support, while the footrest extends effortlessly for full-body relaxation. **BoF**
