

Samuelson Furniture: Senior Living Chairs

Living by Samuelson is designed for the senior living market. The furniture features upscale design elements but keeps ergonomics in mind to meet the needs of senior citizens. Chair heights and depths have been engineered for ease of entry and exit. Furniture shapes provide comfort but are structured that one's body won't fall too deeply into a chair. Chair arms are built to handle heavy use to support full body weight. The chair back features the CATCH hardware system to suspend a folded walker.
