13. THE MADISON CHAIR FROM SAMUELSON FURNITURE

13

Ideal for senior living communities and healthcare facilities, the Madison Chair offers a comfortable seat with heights and depths that have been engineered for ease of entry and exit. The option to include a discreet TILT system allows the seats to tilt forward, exposing a drop-through frame that makes the chair easy to clean. There is also the option for a patent-pending hardware system called CATCH by Samuelson that suspends a folded walker on the back of the chair.

7. AA/27 FROM ABOUTWATER BY BOFFI AND FANTINI

AA/27, designed by Michael Anastassiades for Aboutwater by Boffi and Fantini, is composed of two elements—handle and spout—combined by a third, horizontal cylindrical element, to allow the spout to float above the surface. Dimensions, thickness and volumes of the different fittings each play a role to present one harmoniously proportioned design. The collection spans a faucet, deck and wall-mounted tub filler, and a shower.

8. AFILO FROM GESSI

Afilo's flowing water, glowing lights and illusion of floating in space bring beautiful visuals to the shower experience. These fixtures appear to be suspended in midair while diffusing soft chromatherapy lights amidst the streaming water. Designed as an overhead rainfall/waterfall shower, the Afilo collection includes fixtures in square, round and rectangular shapes that may be installed recessed into the ceiling or exposed in a boxed design.

9. DESCANSO WHEEL HANDLE FROM CALIFORNIA FAUCETS

The "industrial chic" style of Descanso bath series is enhanced with a new Wheel Handle option. Looking back to the vintage vibe of mid-century valve handles, the new Wheel Handle is an ergonomic and aesthetic choice. A spoked wheel design and comfortable scalloped edge make the wheel easy to grip and turn. Plus, the Wheel Handle is available in a dramatic new red powder coat finish.

10. ADAPT FROM HIGHTOWER

Marking the first partnership of Hightower Studio and Australian designer Ross Gardam, the Adapt seating collection gives commercial spaces the ability to configure for future needs in the long term. It includes a lounge, settee, sofa, bench/ottoman, sectional and a table. The varying elevations and configurations of Adapt include three height levels plus a backless option that can all be included in one layout.

11. BIG TALK FROM SCANDINAVIAN SPACES

Designed to stand alone or grouped together, Big Talk offers a range of pairings to accommodate a variety of interior spaces. When joined, the lounge chairs create a modular loveseat in an undulating spectrum of colorful bands. Both the seat and backrest are shaped out of molded foam and are offered in a variety of different shades of velvet.

12. SOFT ROCK FROM NARBUTUS

SOFT ROCK is a new lounge seating system which represents the constant changes of office space and people that work there. Inspired by the next generation workforce, this new collection adds more freedom and mobility to modern offices and forms a relaxing environment for both rest and work. The novel lounge seaters can blend subtly into all kinds of environments for public and private use.

14. TOOAPICNIC FROM ARCADIA

Connect with others or find time alone with TOOaPICNIC, a modern collection of single- and two-person lounge options from Arcadia. Low- and high-back panels provide as much or as little privacy as needed, and double occupancy styles include an integrated table that blends seamlessly into the base to give the series its signature look. This seating option is ideal for touch-down sessions, one-on-one visits or as a work pod for focused activities.
